Articles

AUTHOR	TITLE	PAGE
Tom M. Apostol and Mamikon A. Mnatsakanian	The method of sweeping tangents	396
Adam Bailey	A geometric interpretation of equal sums of cubes	8
C. J. Bradley	The Fermat point configuration	214
Rob Eastaway	Joined up mathematics (Presidential Address 2008)	386
Michael Fox, Adrian Oldknow, John Rigby, Christopher Zeeman	The Soddy spheres of a 4-ball tetrahedron: Part 1	205
Michael Fox, Adrian Oldknow, John Rigby, Christopher Zeeman	The Soddy spheres of a 4-ball tetrahedron: Part 2	418
H. Brian Griffiths	The Divine Proportion, matrices and Fibonacci numbers	14
Martin Griffiths	Hypercubes and the normal distribution	223
Jonathan Groves	Nice polynomials with three roots	1
Jonathan Groves	Nice symmetric and antisymmetric polynomials	437
Clark Kimberling	Twenty-one points on the nine-point circle	29
Barry Lewis	More power to Pascal	454
John Mahony	The cone-paraboloid intercept	235
Maria Flavia Mammana and Biagio Micale	Quadrilaterals of triangle centres	466

AUTHOR	TITLE	PAGE
Alex Pathan	Euler's and Barker's equations: A geometric derivation of the time of flight along parabolic trajectories	39
Sandra Pulver	Quaternions: The hypercomplex number system	431
Simone Rinaldi and D. G. Rogers	Indecomposability: polyominoes and polyomino tilings	193
D. G. Rogers	Jacob Bronowski (1908-1974)	476
Norman Routledge	Computing Farey Series	55
Norman Routledge	Summing Euler's ϕ -function	242
Bogdan Suceavă, Adrian Vajiac, Mihaela Vajiac	The power of a point for some real algebraic curves	22
Robert M. Young	A serendipitous path to a famous inequality	50

Correspondence

Michael de Villiers	167	Nick Lord	167
Andrew Jobbings	348		

Matter for Debate

AUTHOR	TITLE	PAGE
Christopher Ormell	Can we understand uncountability?	252

Feedback

March pp. 165-167	Michael Fox		
July pp. 349-355	Mike Hirschhorn	Terence Jackson	Andrew Jobbings
	Nick Lord	J. A. Scott	Stuart Simons
November pp. 570-572	Nigel Backhouse	Mike Hirschhorn	John Mahony

Miscellaneous

Thirteenth Annual *Mathematical Gazette* Writing Awards 222

Acknowledgements 591

Notes

March	92.01 – 92.29
July	92.30 – 92.59
November	92.60 – 92.90

AUTHOR	NO.	TITLE	PAGE
Jack Astin	92.39	A discriminant that forms a geometric sequence	286
Michel Bataille	92.75	A curious way to the weighted AM-GM inequality	533
Roger Bilisoly	92.45	Anasquares: Square anagrams of squares	301
C. J. Bradley	92.57	Generalisation of the Droz-Farny lines	332
P. S. Bullen and R. Vybomý	92.11	A remarkable formula	94
David Cariolaro and Ko-Wei Lih	92.81	The edge-choosability of the tetrahedron	543
Stephen Casey	92.47	The converse of the theorem of Pythagoras	309
Robin Chapman	92.10	Evaluating $\sum_{n=1}^N (a \pm nd)^p$ again	92
Robert J. Clarke	92.51	Some rules of the triangle	319
Stefano Costa	92.72	Geometry of the sums of consecutive integer powers	516
P. Dale	92.20	Application of inversion to touching hyperspheres	128
Prithwijit De	92.32	A pair of insoluble Diophantine equations arising from an equilateral triangle	261
Thomas P. Dence	92.70	Sums of simple rearrangements of the alternating harmonic series	511
Russell Euler and Jawad Sadek	92.33	A cubic Diophantine equation re-examined	263
Harley Flanders	92.36	A singular integral	276
Colin Foster	92.16	Avoiding Pythagoras	110
Paul Gailiunas	92.19	Orthologic triangles and Miquel's theorem	125
Martin Griffiths	92.38	Ellipses, ovals and the area of the M25	282
Martin Griffiths	92.68	Affine transformations of the graphs of polynomials	504
Martin Griffiths	92.83	Learning Russian	551
Martin Griffiths	92.84	Partitioning rugby scores	555
Nuran Guzel and Hasan Unal	92.78	Proof without words: the sine of a sum	536
Nguyen Minh Ha and Nikolaos Dergiades	92.26	An elementary proof of the generalised Fermat problem	141
Michael D. Hirschhorn	92.29	Three scenarios involving elastic collisions	154
Michael D. Hirschhorn	92.87	Pythagoras' Theorem	565

AUTHOR	NO.	TITLE	PAGE
Larry Hoehn	92.49	A generalisation of Pythagoras' theorem	316
Steve Humble	92.40	Rendezvous constants	287
Iyoung Michelle Jung	92.69	A proof of $\sum_{k=0}^{n-1} 2^k \tan(2^k x) = \cot x - 2^n \cot(2^n x)$	510
A. D. Keedwell	92.31	Euclid's algorithm and the money changing problem	259
Jeremy D. King	92.28	Angles in croquet	150
Adrian R. Kitson	92.42	The prime analogue of the Kepler-Bouwkamp constant	293
Thomas Koshy	92.62	Pythagorean triples with Pell generators	486
Philip W. Kuchel	92.82	$10n^2 + 2$ revealed	546
Awani Kumar	92.17	Magic knight's tours for chess in three dimensions	111
Ron Larham	92.37	A curved railway platform canopy	278
Teik-Cheng Lim	92.12	Two infinite nested radical constants	96
Nick Lord	92.03	A uniform construction of some infinite coprime sequences	66
Nick Lord	92.22	Maths bite: averaging polygons	134
Nick Lord	92.41	Maths bite: Pythagoras causes chaos!	290
Nick Lord	92.44	Euler-type constants for the mid-ordinate rule	300
Nick Lord	92.54	'Look-see' constructions of a regular pentagon	324
Nick Lord	92.73	The closed form evaluation of $\sum_{n=1}^{\infty} \frac{1}{n^2(n+1)^2}$ and related Eulerian sums	522
Nick Lord	92.74	On inequalities equivalent to the inequality of the means	529
Nick Lord	92.76	Maths bite: irrational powers of irrational numbers can be rational	534
Nick Lord and Paul Glaister	92.07	A generalised algebraic identity bites Pythagoras	82
Grzegorz Łysik	92.13	The ε -binomial inequality	97
Des MacHale	92.30	The well-ordering principle for \mathbb{N}	257
Des MacHale	92.79	A mathematical gem	536
D. MacHale and C. van den Bosch	92.63	Some Diophantine tricks	490
John Mahony	92.15	An improved approximation to a well-known integral	106
K. Robin McLean	92.52	Trisecting angles with ruler and compasses	320
Douglas W. Mitchell	92.50	The 2:3:4, 3:4:5, 4:5:6 and 3:5:7 triangles	317
W. D. Munn	92.89	Ellipses circumscribing convex quadrilaterals	566
Robin Murphy	92.80	Exploring numerical integration on a spreadsheet	537
J. R. Nurcombe	92.71	On an infinite series	514

INDEX

v

AUTHOR	NO.	TITLE	PAGE
Jane O'Flynn	92.05	When is the sum of consecutive n th powers an n th power?	71
Michael O'Loughlin	92.65	Graphs of quadratic polynomials	495
Michael O'Loughlin	92.66	The centre of symmetry of a cubic polynomial	497
Thomas J. Osler	92.43	Euler's little summation formula and special values of the zeta function	295
Oren Peles	92.06	A relation between the roots of a polynomial and its coefficients	76
Poobhalan Pillay	92.64	Proof of an aphorism from the Vedas	492
Juan Pla	92.61	Linear recurrences which produce Pythagorean triples	482
Ángel Plaza and Sergio Falcón	92.60	A recurrence relation for Fibonacci sums: a combinatorial approach	480
Edgar Rechtschaffen	92.35	Real roots of cubics: explicit formula for quasi-solutions	268
Jennifer Richinick	92.48	The upside-down Pythagorean theorem	313
John Rigby	92.53	A regular $(6n \pm 1)$ -gon inscribed in an equilateral triangle	323
Anthony C. Robin	92.85	Sharing resources as fairly as possible	559
J. A. Scott	92.04	Square-free integers once again	70
J. A. Scott	92.56	Another rectangular hyperbola for the triangle	331
H. A. Shah Ali	92.02	The number of S.P numbers is finite	64
J. P. Shiwalkar and M. N. Deshpande	92.27	The number of HH's in a coin-tossing experiment and the Fibonacci sequence	147
Stuart Simons	92.08	Summing digits of an arithmetic sequence	83
Stuart Simons	92.14	Some aspects of the behaviour of the graph of $f_1(x, y)f_2(x, y) \dots f_N(x, y) = \epsilon$	99
Stuart Simons	92.21	Area and perimeter ratios	133
Stuart Simons	92.59	Curious collisions	341
Stuart Simons	92.67	Parametric forms for general polynomial equations	499
Stuart Simons	92.86	Some simple geometry	563
Stuart Simons	92.90	A novel approach to projectile paths	568
Stuart Simons and Andrew Tworkowski	92.58	Stable charge clusters	335
Paul Stephenson	92.23	Tilings into tilings	135
Paul Stephenson	92.24	Counting faces on Archimedean solids	137
Paul Stephenson	92.55	Reconstructing heronian triangles	328
B. Sury	92.01	Of grand-aunts and Fibonacci	63
B. Sury	92.77	A generalisation of the irrationality of e	535

AUTHOR	NO.	TITLE	PAGE
Fukuzo Suzuki	92.18	Generalisations of the Napoleon theorems, and triangles circumscribing a given triangle	115
Hung-Ping Tsao	92.09	Explicit polynomial expressions for sums of powers of an arithmetic progression	87
Roger Voles	92.25	Finding lost cousins	138
Tony Ward	92.46	A permutation-ordering algorithm	307
E. E. Wright	92.88	On a quadrilateral with three equal sides	565
I. J. Zucker	92.34	The cubic equation – a new look at the irreducible case	264

Teaching Notes

Glyn George	A seldom used formula for ODEs	344
Peter Macgregor	A rapid method to find a tangent to a circle	160
Des MacHale	The distance from a point to a line	159
Des MacHale	Integration without tears – two for the price of one	160
Daniel Timms	Proof without words: Infinite sum of a GP	344
David Wells	A surprise with parallel lines: an exploration that went wrong, then right	162

Reviews

AUTHOR	TITLE	REVIEWER	PAGE
Titu Andreescu, Oleg Mushkarov, and Luchezar Stoyanov	Geometric problems on maxima and minima	<i>Michael de Villiers</i>	589
Avner Ash and Robert Gross	Fearless symmetry, exposing the hidden patterns of numbers	<i>Anthony C. Robin</i>	584
Antonio Becchi, Massimo Corradi, Federico Foce & Orietta Pedemonte, (eds)	Essays on the history of mechanics	<i>Michael de Villiers</i>	180
Kai Lai Chung and John B. Walsh	Markov processes, Brownian motion and time symmetry (second edition)	<i>David Applebaum</i>	186
Richard Crandall and Carl Pomerance	Prime numbers – a computational perspective (2nd edn)	<i>Ron Knott</i>	183
Thibault Damour, (trans. Eric Novak)	Once upon Einstein	<i>Tony Crilly</i>	179
Michael J. de Smith	Maths for the mystified	<i>Jennie Golding</i>	368
Antonio Duran, Georges Ifrah and Alberto Mangel	The life of numbers	<i>Michael Ward</i>	371
